special·surveillanceorregulatorycontr.olaftersale;

"containment" means the methods or physical structures that prevent the dispersion of radioactive substances;

"contamination" meansthepresence of radioactive substances in or on a material or the human body or other place where they are undesirable or could be harmful or the process giving rise to their presence in such places;

"clearance"meanstheremovalofradioacti vematerialorradioactiveobjectswithinauthori zedactivitiesfrom anyfurtherregulatorycontrolbytheCommissi on:

"clearancelevels" means values established by the Commission and expressed in terms of activity

concentrationsortotalactivity, atorbelow which sources

of radiation may be released from regulatory control by the Commission;

"decommissioning" means all steps leading to the release of a facility, other than a disposal facility, from regulatory control ot her than confirming the decommissioned status of a facility and includes the processes for decontamination and dismant ling

"DirectorGeneral"meansthechiefexecutiveofficer

of the Commission appointed under section 9;

"discharges" meansplanned and controlled releases into the environment, as a legitimate practice, within the limits authorized by the Commission, of liquidorgaseous radio a ctive material that originate & from regulated nuclear facilities during normal operations

"disposal" means the emplacement of spent fuelor radio active was tein an appropriate facility without the intention of retrieval;

"dose"meansameasureoftheradiationreceive dorabsorbedbyatarget;

"doselimit"meansthevalueoftheeffectivedoseortheequiv alentdosetoindividualsfromcontrolledactivitiesthatmaynotbee xceeded;

"exemption" means the determination by the Commission that a tasource or activity need not be subject to some or all aspects of regulatory control on the basis that the exposure (including potentiale xposure) due to the source or activity is too small towarrant the application of those aspects or that this is the optimum option for protection ir respective of the actual level of the dose sorrisks;
